

Finalized Project Outline: Enterprise Workstation Deployment (HP Desktop with Dual Monitors)

Project Title: Enterprise Workstation Deployment and Standardized Configuration (HP Desktop for New Domain Integration)

1. Project Objective:

- Purpose: To deploy a new HP desktop computer with Windows 11, setting it up to organizational standards by following a comprehensive computer deployment checklist, and configuring it for immediate user productivity within a new domain environment.
- Problem Solved: Provided a fully functional, secure, and standardized new workstation ready for user assignment, ensuring seamless integration into the KCAD (Kansas City Aviation Department) environment and its domain.

2. Tools & Technologies Used:

- Operating System: Windows 11
- Computer Type: HP Desktop PC
- Monitors: Two monitors
- Imaging Solution: Enterprise imaging system used to deploy the base Windows 11 image (e.g., PXE boot system, Microsoft SCCM/MDT, or similar internal deployment tool).
- Deployment Checklist: KCAD - Information Services Support Computer Deployment Checklist (APP-M2ILS).
- Software & Services Configured: Zscaler, PeopleSoft, Duo Mobile, Adobe Acrobat DC, Outlook, Calendar, Teams, OneDrive, Snagging Tool.
- Network Components: Ethernet connection for network drives and domain join.
- Peripherals: Dell Dock, keyboard, mouse.

3. Detailed Steps Performed:

- * A. Initial Preparation & Imaging (Bench Work):
 - * "Received a new HP desktop computer designated for deployment within the KCAD Aviation Police division."
 - * "Initiated the re-imaging process to deploy a standardized Windows 11 operating system image onto the desktop's primary storage drive."
 - * "Confirmed successful image deployment and verified the PC was named correctly according to organizational conventions, utilizing the provided service tag and asset tag for accurate identification (e.g., Dell Service Tag: G5TWK44, Asset Tag Number: 9739)."
 - * "Ensured all Windows updates were applied (including potential changes from Windows 11 Pro to Windows 11 Enterprise)."
 - * "Verified BIOS/Hardware drivers were updated to ensure optimal system performance and compatibility."
 - * "Installed City of Kansas City standard software, including Microsoft Office and Adobe Acrobat Reader."

- * B. Computer Setup & Technician Configuration:
 - * "Configured essential network drive mappings to provide users with access to shared organizational resources."
 - * "Ensured the Adobe Acrobat DC software was properly configured for PDF handling."
 - * "Configured core communication and collaboration applications: Outlook, Calendar, and Microsoft Teams."
 - * "Set up OneDrive for cloud storage synchronization, ensuring user files were accessible and backed up."
 - * "Installed and configured Zscaler for secure internet access, ensuring the desktop adhered to organizational security policies for web traffic."
 - * "Installed and configured Duo Mobile for two-step security, enabling multi-factor authentication for user logins."
 - * "Installed the Snagging Tool while logged in as an End User, ensuring proper user-level permissions and functionality."
 - * "Connected and verified other peripherals as required, ensuring full system functionality."
 - * "Installed and configured any other licensed applications as per the deployment checklist."
- * C. Configuration Check (Customer and Technician):
 - * "Verified server connections were mapped correctly."
 - * "Tested Outlook, Calendar, and Microsoft Teams functionality to ensure email, scheduling, and communication were operational."
 - * "Ensured web browser bookmarks were imported (if applicable) to maintain user preferences."
 - * "Configured and tested any necessary map printers."
 - * "Confirmed KCAD Internal Wi-Fi connectivity and performance."
 - * "Installed and configured any other required software."
 - * "Verified all other peripherals were correctly connected and functional."
- * D. Equipment Deployed & Final Verification:
 - * "Deployed the new HP desktop computer to the user's cubicle."
 - * "Connected and configured two monitors, ensuring proper extended desktop setup and display resolution."
 - * "Installed the Dell docking station, keyboard, and mouse, verifying all connections."
 - * "Connected all necessary power supplies (for both the dock and the PC)."
 - * "Performed final sign-offs with both the KCAD Customer (Airport Police) and KCAD Technician, confirming all deployment checklist items were completed and the system was fully operational and accepted by the user."

4. Outcome & Impact:

- * "Successfully deployed a fully configured and standardized new Windows 11 HP desktop workstation with dual monitors, adhering strictly to the 'KC Aviation - Information Services Support Computer Deployment Checklist'."
- * "Provided immediate productivity for the end-user by ensuring all essential software (Microsoft Office, Adobe Acrobat DC, Microsoft Teams), network resources, and security configurations (Zscaler, Duo Mobile) were correctly in place from initial setup."
- * "Contributed to efficient IT operations by following a methodical deployment process for new systems, ensuring consistency and seamless integration into the organizational environment."

5. Skills Demonstrated:

- * Operating System Deployment & Installation (Windows 11)
- * Workstation Configuration & Standardization
- * Hardware Installation & Peripheral Setup (Dual Monitors, Docking Station, Keyboard, Mouse)
- * Software Installation & Configuration (Microsoft Office, Adobe Acrobat DC, Zscaler, Duo Mobile, Microsoft Teams)
- * Network Integration (Domain Join, Network Drive Mappings, Wi-Fi)
- * Adherence to Standard Operating Procedures (SOPs) & Checklists
- * System Testing & Quality Assurance
- * Problem Prevention (through thorough setup)
- * Attention to Detail
- * IT Service Management (following deployment procedures)
